Measurement: Units & Conversion: Easy Practice Paper 2 Answers

Q#	Answer	Explanation
1	B	There are 10 millimetres in every centimetre.
2	D	There are 100 cm in 1 m, so multiply by 100: 7 × 100 = 700 cm.
3	B	There are 1,000 ml in 1 litre, so divide by 1,000: 3,000 ÷ 1,000 = 3 litres.
4	C	An hour is 60 minutes, and a quarter of 60 is 60 ÷ 4 = 15 minutes.
5	C	There are 1,000 g in 1 kg, so 6 × 1,000 = 6,000 g.
6	C	£2 is 200p and 50p is the part after the point, so altogether it is 250p.
7	C	A football pitch is about 100 long paces, so metres is the sensible unit. Kilometres would be far too large.
8	B	There are 10 mm in 1 cm, so divide by 10: 80 ÷ 10 = 8 cm.
9	D	Each day has 24 hours, so 2 days is 2 × 24 = 48 hours.
10	E	Change them all to grams: 250 g, 500 g, 750 g, 1,000 g and 1,500 g. The heaviest is 1,500 g.
11	D	1 litre is 1,000 ml and half a litre is 500 ml, so 1.5 litres is 1,500 ml.
12	B	Divide by 100 to change centimetres into metres: 250 ÷ 100 = 2.5 m.
13	D	A kilogram is 1,000 g, and half of 1,000 is 500 g.
14	C	Both times are in the same hour, so subtract the minutes: 50 − 15 = 35 minutes.
15	C	3 m is 300 cm, and adding the extra 20 cm gives 320 cm.
