# Mental Arithmetic & Times Tables: Easy Practice Paper 2 Answers

| Q# | Answer | Explanation |
|---|---|---|
| 1 | C | 9 × 7 = 63. A quick check: 10 × 7 = 70, then take away one 7 to get 63. |
| 2 | C | 8 × 6 = 48. You can also think of it as double 24. |
| 3 | C | Ask how many 7s make 56. Since 7 × 8 = 56, the answer is 8. |
| 4 | D | Ask how many 4s make 36. Since 4 × 9 = 36, the answer is 9. |
| 5 | C | Double 40 is 80 and double 5 is 10, so double 45 is 80 + 10 = 90. |
| 6 | D | Half of 90 is 45 and half of 6 is 3, so half of 96 is 45 + 3 = 48. |
| 7 | D | Add 40 to 38 to get 78, then add the remaining 7 to get 85. |
| 8 | C | Take 30 from 82 to get 52, then take away 5 more to get 47. |
| 9 | C | 11 × 9 = 99. You can work it out as 10 × 9 = 90, plus one more 9. |
| 10 | C | Dividing by 10 moves every digit one place to the right, so 350 becomes 35. |
| 11 | D | Work backwards by multiplying: 8 × 4 = 32. Check: 32 ÷ 4 = 8. |
| 12 | D | Twelve bags of 4 is 12 × 4 = 48 sweets. |
| 13 | C | 7 × 7 = 49. This is a square number worth learning by heart. |
| 14 | C | Think of 6 + 7 = 13, so 60 + 70 = 130. |
| 15 | C | Share the length equally: 60 ÷ 5 = 12, so each piece is 12 cm long. |
