Mental Arithmetic & Times Tables: Medium Practice Paper 5 Answers

Q#	Answer	Explanation
1	D	Multiplication comes first: 6 × 9 = 54, then 54 + 26 = 80.
2	C	11 × 8 = 88. Work it out as 10 × 8 = 80, plus one more 8.
3	C	Since 11 × 11 = 121, dividing 121 by 11 gives 11.
4	D	Multiply by 10 and halve: 24 × 10 = 240, and half of 240 is 120.
5	C	Add 150 to 275 to get 425, then take away the extra 2 to get 423.
6	C	Count up from 375: 25 more makes 400, then 600 more makes 1,000, giving 625 altogether.
7	D	Work from left to right: 8 × 3 = 24, then 24 × 2 = 48.
8	B	Count up from 750: 250 more makes 1,000, then 1,000 more makes 2,000, giving 1,250 altogether.
9	C	Multiplying by 100 moves every digit two places to the left, so 0.6 becomes 60.
10	D	Double 500 is 1,000, so double 490 is 1,000 − 20 = 980.
11	C	Rearranging, the missing number is 91 ÷ 7 = 13. Check: 91 ÷ 13 = 7.
12	B	Multiplication comes before subtraction: 3 × 12 = 36, then 50 − 36 = 14.
13	B	One hour after 09:45 is 10:45. Adding 20 minutes more gives 11:05.
14	D	Half of 800 is 400 and half of 50 is 25, so half of 850 is 425.
15	C	£3.60 is 360p, and 360 ÷ 45 = 8. Check: 8 × 45p = 360p.
